

# Adapt faster to disruptive markets

Agile ERP with Microsoft Dynamics 365

## • Striving for agility

In today's "permacrisis" market, organizations struggle to keep pace with the current speed of business. Microsoft asked leaders what they see as the key to thriving and heard one word: **agility**.

## • Legacy system roadblocks

Most leaders are making the effort to put innovation into action with AI-powered tools, but not all believe their organizations are sufficiently equipped.

93%<sup>1</sup>

rely on business intelligence software to reduce time to action

91%<sup>1</sup>

use cloud-based business operation software to drive innovation

However,  
42%<sup>1</sup>

are not sufficiently equipped with software they need

## Closing the agility gap

To differentiate, organizations must reassess their approach to agility. They need new, AI-powered ERP software to move forward—software designed to support innovation.

ERP software capabilities that are critical to enabling agility, according to business leaders:

90%<sup>1</sup>

task automation

87%<sup>1</sup>

real-time data and analytics

86%<sup>1</sup>

scalability with business growth
