

Selling My Trusted Bike in Chennai

– A Reliable Ride Looking for a New Owner

[sell bike in chennai](#), It's never easy to part ways with something that's been such a big part of your daily life. My bike has been more than just a mode of transport — it's been my companion through early morning commutes, late-night rides through Marina Beach, spontaneous weekend getaways, and everything in between. But as life takes new turns, priorities change, and now it's time for someone else to take the handlebars and ride it into the next chapter.

I'm selling my well-maintained, dependable two-wheeler — a Honda Unicorn 160, 2020 model, registered in Chennai. It's in excellent condition, both mechanically and aesthetically, and is perfectly suited for someone looking for a reliable and stylish ride that's ready for city life. Whether you're commuting daily from Tambaram to Guindy or cruising along the East Coast Road on weekends, this bike won't let you down.

Built for Chennai Roads, Maintained with Care

The Honda Unicorn is known for its refined engine, smooth handling, and practical design — and this one has lived up to every bit of that reputation. With just over 28,000 kilometers on the odometer, the engine still runs like new. It starts effortlessly every time, even after days of rest, and the power delivery is consistent and smooth. I've taken utmost care to service it regularly from authorized Honda service centers, keeping the engine performance sharp and the ride quality top-notch.

In a city like Chennai where you often deal with stop-and-go traffic, unpredictable road conditions, and sudden weather shifts, this bike handles everything with confidence. The suspension absorbs rough patches well, especially in areas like Perambur or Pallavaram, where roads can be slightly uneven. The tires have plenty of life left, and the brakes are responsive, giving you total control even in chaotic traffic.

The clutch is light and doesn't tire your hand during long rides, while the gearbox shifts smoothly with no resistance or noise. The mileage averages around 50 to 55 kilometers per litre — a blessing in today's fuel economy — making it a great choice whether you're a student, a professional, or someone who simply enjoys practical riding without extra costs.

Excellent Condition – Inside and Out

This bike has always been kept in covered parking, and it shows. The black paint still has its original shine, and the chrome parts have been polished regularly to prevent rust. There are no major scratches or dents — just a few light scuffs from everyday use, nothing that takes away from the bike's good looks.

The seat is wide, soft, and free of any rips or tears, offering great comfort for both rider and pillion — especially useful for those long city commutes or when riding with a friend or partner. All lights, indicators, horn, and the digital-analog meter console are in perfect working condition.

Even the smallest details have been taken care of. The chain has been lubricated on schedule, the air filter is clean, and the battery was replaced less than a year ago, so you won't have to worry about unexpected breakdowns. It's a complete package, ready to ride the moment you buy it — no repairs, no replacements, no excuses.

Useful Add-Ons and Accessories Included

Along with the bike, I'm also including some practical accessories that add value and make everyday riding even smoother:

- A high-quality mobile holder with an in-built USB charger, ideal for navigation during long rides or delivery work.
- A strong crash guard for added protection, especially in Chennai's tight traffic.
- A full-size center stand and side stand for easy parking anywhere — whether you're in a narrow street in Royapettah or on a sloped road in Kilpauk.
- Both rear-view mirrors are intact and anti-glare, offering a clear view even during night-time rides.

You'll also receive both original keys, the toolkit, user manual, and all original parts including the factory-fitted exhaust and indicators.

Ownership and Documentation – Clean and Clear

I am the first and only owner of this bike, and all the documentation is up to date and clear. It's registered in Chennai (TN registration), and the RC book/card is in my name. The insurance is valid until July next year, and the pollution certificate is current.

You don't need to worry about legal paperwork or ownership issues — everything is in order, and I'll assist with the ownership transfer process if needed. The bike has never been in an accident and has not been used for any commercial purpose. It's a clean machine with a clean history.

Why I'm Selling

This isn't a distress sale. I'm not in a hurry, nor am I looking to dump a bike that has problems. In fact, it's just the opposite. I'm selling this bike because my daily routine has changed significantly. Since transitioning to a full work-from-home schedule and buying a family car recently, I simply don't use the bike anymore. It now sits unused in my garage, which feels like a waste for something that still runs so beautifully.

I believe machines are meant to be used, not stored. And I'd rather see this bike being ridden every day, serving someone else the way it served me.

Perfect for Every Kind of Rider

Whether you're a college student from Anna University or IIT Madras, a software engineer commuting to Tidel Park or Siruseri, or even someone doing part-time delivery work across the city — this bike is a smart, economical choice.

It's light enough for new riders to handle, yet powerful enough to handle long-distance weekend rides. The riding posture is upright and comfortable, which makes it easy on your back and shoulders during peak-hour traffic near areas like Koyambedu or Teynampet.

If you're someone who values performance without compromising on reliability or running costs, this bike is ideal for you.

Price and Final Thoughts

I'm offering the bike for ₹68,000 — a fair price considering its condition, low usage, regular service history, and additional accessories. I'm slightly negotiable, but only for genuine buyers who truly understand the value of a well-maintained bike.

If you're interested, I'd be happy to arrange a test ride in and around Velachery or any nearby area. I encourage serious buyers to come check the bike in person — bring a friend or even a mechanic if you like. I'm confident the bike will speak for itself.

Let's Get in Touch

If you're in Chennai and in the market for a dependable, fuel-efficient, stylish commuter bike, this might be exactly what you're looking for. It's road-ready, stress-free, and waiting for a new rider to take it forward.
